I worked with Tibor at BorgWarner when I started in 1991. I was young and had a lot to learn. Tibor spent a lot of time with me (more than he had to) and he taught me so much. I will always remember him as somebody who affected my life in a positive way. He was a patient and thoughtful man and he'll be remembered as one of the good ones.

I worked with Tibor from when I started at Borg Warner in 1983 until he retired. He was such interesting guy to get to know and full of lots of good ideas. At the time we both owned Fiat X19 convertibles so that was the first thing we had in common to talk about. He would always leave his keys in his car so sometimes during the day I would go out and move his car to a different spot, which I always thought was great fun, but didn't seem to bother him much. I'm glad to see he was able to continue with art and creating new works. He was really a talented guy. My condolences to all his family and friends.
